

# Granulators PM Series

Model 15/21 M2,6

## CHARACTERISTICS

Compact granulator especially designed for the recuperation of thermoplastic material small sprues, to be placed at the side of the production machine.

## DESCRIPTION

- Easy to clean.
- Adjustable counterknives.
- Quick access for change of knives and screen.
- The shape of the rotor and the screen ensure even granulate.
- Manual feed.
- Safety features in accordance with international standards.
- Control cabinet incorporated in the granulator.
- Motors protected by thermal relay.

## OPTIONAL

- Sound-proofed with acoustic level well below the values permitted in Europe.
- Air-intake or mechanical transport or recuperated material.
- Entry of material by manipulator or conveyor belt.
- Special screens, feed hoppers and frames.

TECHNICAL DATA	15/21 PM
Feed throat(mm)	150 x 210
Cutting Ø (mm)	166
Motor Power (HP)	2,6
Motor Power (kW)	1,9
Number of knives on rotor	3
Number of knives cutters	2
Normal Ø screen perforation (mm)	6
Production rate, according to mat. (Kg/h)	40 - 60
Approximate weight (Kg)	105
Approx. weight soundproof model (Kg)	105
Approximate measures (mm)	545 x 690 x 1295
